Hello! I'm currently an undergraduate university student at the department of Informatics at the Ionian University. Right now, I'm at my third year of my studies and I have experienced some projects, situations and lessons. At our academic lessons we have seen some basic knowledges like Data Base and programming with basic languages like C. I have also participated in some projects, one of them is a competition of the Udacity University and schools IEEE branch. So far, that it! If you want to learn more about me scroll down!

## Education

2013 - 2016 Ph.D. High School Graduate

2016 - Present Undergraduate Student  
Majoring in Computer Science

Ionian University

## Projects

Shooter <https://myrtop.github.io/Shooter/menu.html>, A school project  
Super Mario <https://myrtop.github.io/Super-Mario/menu.html>, A school project, which was meant to teach us the UI with the computers and the users.
